On this page, we compare Privacy Checkpoint with other Vpn services like SurfEasy. Is it a VPN service? It's actually a combination of VPN services and proxy services. It allows you to do all the things you can do with a VPN. It allows you to bypass censorship and access websites and apps that you can't access. It's a way for the government to monitor users. This allows us to track users' locations and see their browsing histories. Tips & tricks We suggest using CyberGhost Pro software when using an account with a self-inflicted IP address, or when using IP masking. Another option is using a VPN in conjunction with Blue Security. If you're looking to create a private network for your organization, Blue Security may be the solution you're looking for. Smart Support Center Core Features Export the list of Vpn Accounts in a CSV or XLS file. 1 Method 3,765 Votes 3.5. The next major announcement was the inclusion of two-factor authentication. This is an extra layer of protection against phishing attacks. If a hacker were to somehow gain access to your e-mail account, they would not be able to login with their usual username and password. First time users will have to confirm their new username and password by entering a form of authentication code sent to their mobile device. This process is often times called "2 factor" authentication, as the user has to have their username and password, plus an additional text code sent to their mobile device.
