The MIT Math Course on the Internet - learn and review online, how to download And, I'm really gonna go with this one, because this is a really, really, really, really tough problem. A: The problem is that we have to find the length of the words "rao", "sociology", and "book" before we can apply the method. We'll first determine the longest word in the title. This way we can see that the longest word in the title is "book". We'll just get rid of everything before "book" and keep that as the longest word. And now we'll need to find all the occurrences of "book" in the title. We'll use regex to find all of the occurrences. And that gives us the array: array(8) { [0]=> array(1) { [0]=> string(21) "book" } [1]=> array(1) { [0]=> string(21) "book" } [2]=> array
