AutoCAD is available for different operating systems including Windows, macOS, and Linux. AutoCAD's roots in architecture and urban planning AutoCAD's roots are in architectural, urban planning, and civil engineering design. The program's name is a portmanteau of "automated" and "cadastre." "Autocad" refers to a small-scale survey map, as opposed to a full-scale map that would be used to plan an entire city. The term "cadastre" was coined in the early 20th century by the first premier of New Zealand, Michael Joseph Savage, who used maps to communicate and distribute information. Savage felt that the information on maps was often missing or incomplete. Autocad's early development was aimed at architecture and urban planning. One of the first early developers of AutoCAD was author and architect William S. Haseltine, who in the early 1970s became the main AutoCAD user at Architecture and Urban Planning magazine. Haseltine worked on a number of AutoCAD extensions before he left the magazine in 1979 and founded the company Autodesk. In the early 1980s, Haseltine was influenced by Jane Jacobs, a sociologist and the author of books such as *The Death and Life of Great American Cities* and *The Economy of Cities*. Jacobs is best known for her theories on urban planning and how the physical environment affects human life. Her theories, such as the "character of a neighborhood" and "eyes on the street," influenced Haseltine. This philosophy informs AutoCAD in several ways. An important philosophy of AutoCAD AutoCAD is often referred to as a universal drafting program. It can be used for many types of design, but its early roots and development was in architecture and urban planning. In the early 1980s, Haseltine was influenced by the writings of the sociologist Jane Jacobs, whose "eyes on the street" philosophy influenced AutoCAD. According to an Autodesk blog post by Haseltine and author Steven Symington, "the eyes-on-the-street philosophy doesn't mean that you can't create elegant models. I use my hands too. But it does mean you can't design the kind of stuff we designed back in the 1970s." Haseltine's vision for AutoCAD

Six-month results after an educational intervention for patients with acute myocardial infarction and noncardiac chest pain. An observational cohort study was conducted to determine the effect of an educational intervention on compliance with the American Heart Association (AHA) recommendations for cardiovascular disease risk reduction. A total of 200 consecutive patients with acute myocardial infarction and noncardiac chest pain were evaluated by a cardiologist and registered nurse in a single group, pre- and postintervention, to determine their cardiovascular disease risk. AHA-recommended risk factor assessments and life-style modification recommendations were taught to the patients. At 6 months, 99 patients were contacted and asked to evaluate their self-management of cardiovascular disease risk factors. Patients in this study were predominantly white men with an average age of 57.4 years. There were no significant changes in medication compliance or lifestyle recommendations. The intervention had a positive effect on the patients' knowledge of coronary heart disease risk factors. Release of the oscillation propagating mechanism in gamma-ray induced transient states. A semiconductor laser system has been used to investigate the transient oscillations occurring in a cavity length resonator exposed to high-intensity gamma-ray bursts. Although there is no direct proof that the laser probe is influenced by the transient states, the oscillations are sensitive to a pre-burst laser power, and it is shown that the laser probe oscillations increase and decrease in relative phase with the intraband transitions found in the transient states./* * Copyright (C) 2013-2015 RoboVM AB * * Licensed under the Apache License, Version 2.0 (the "License"); * you may not use this file except in compliance with the License. * You may obtain a copy of the License at * * * * Unless required by applicable law or agreed to in writing, software * distributed under the License is distributed on an "AS IS" BASIS, * WITHOUT WARRANTIES OR CONDITIONS OF ANY KIND, either express or implied. * See the License for the specific language governing permissions and * limitations under the License. */ package org.robvm.apple.corebluetooth; /* */ import java.io.*; import java.nio.*; import java.util.*; import
