a license fee is charged for some of the extra features. Add a powerful Search engine to your system? This Traceless Search. Download the freeware, and it can easily do the work, and it is an alternative to google. By Mickey Bauer(Tuesday, 11 June 2006) Traceless Search - From Mickey Bauer Traceless Search is a freeware search engine, similar to Google, Bing, or Altavista. It uses the default search engines that are already installed in the user's computer, and adds the ability to search web pages. Other search engines may require a specific, or even an expensive, subscription, or else have limited capability compared with the full capabilities of Traceless Search. Let's look at Traceless Search's strengths and weaknesses. Search Engine Strengths: There are a few specific features that make Traceless Search a little different from the more traditional search engines. First, when you start a search with Traceless, the program creates an index of web pages that are currently being visited by your computer. This saves you the time it takes to open each page, and allows you to focus on typing your keywords and searching. You can search just one page, or you can 1d6a3396d6
