You can also get KeyMacro 6.4.6 from the following link for FREE.1. Field of the Invention This invention relates to techniques for providing reduced surface area to an edge of a thin substrate. 2. Description of the Prior Art A common method of reducing the surface area of a substrate is by grinding or polishing the surface area. However, this is a relatively costly and labor intensive process, especially when the substrate must be cut to a particular size. Another common method of reducing the surface area of a substrate is to melt the surface of the substrate. This is often done by heating the surface of the substrate to the softening point of the material, whereupon the softened 1d6a3396d6

Power Registry Cleaner Crack Free Registration Code Free
