Overview from ComputerHope: Anti-virus software for the home. Does a good job at the basic functionality of anti

What's New In?

Identity Protection - Smadav combines the fundamental elements of antivirus and firewall to create an effective solution to malware infections and internet misuse. It provides comprehensive protection to your system, detects and removes harmful, unwanted programs, reduces or eliminates the damage that such programs can cause, and helps control internet misuse. Control of Internet Traffic - Smadav works on the basis of a combination of two powerful technologies: Content Guard, which blocks Internet traffic originating from websites that host unwanted files, and Exception List, which enables you to control the Internet traffic entering your computer. USB Armor - Smadav protects your PC from unauthorized use and USB attacks by creating a local shield to prevent malicious programs from using your USB port. Trojan Killer - Smadav launches a special scanning process on the computer that detects the presence of potentially dangerous programs such as Trojans and other potentially harmful software. Computer Security - Smadav can also help you create a stronger layer of protection against newly discovered and unknown threats. It runs a real time defense with an added layer of protection, a Sleep Mode and Passive Protection mode. Auto Block - Smadav provides the automatic blocking of websites or files that are known to contain unwanted software. Real Time Protection - Smadav monitors your PC and all of your installed software while you are using it and always provides active protection. Firewall - Smadav's built-in Firewall can block Internet traffic that attempts to connect to undesired websites. It can be used to protect your PC from web-based attacks. Desktop Search - Smadav's Desktop Search can be used to stop unauthorized access to your computer by searching your hard disk for potentially unwanted software. To make use of all the features of Smadav you need to activate its two additional programs. What's new in version 1.0.4? Better compatibility: The Batch Scan mode has been added, so you can effectively carry out repetitive scans. You are allowed to reproduce and distribute Smadav only if it's installed on your PC. It is a common sense, though, that you are not allowed to publish such information in the Internet. The Smadav utility uses the function of the Windows system to automatically check for updates. The Smadav utility uses a unique feature of Windows. If you see the message of "To view the details of the recent updates" (though there is no such message), open the Smadav utility and follow the instructions

System Requirements For Smadav:

Windows 2000/XP/Vista/7/8/10 Mac OS X (10.4 or later) 15 GB of space Latest version of Adobe AIR installed *Minimum specifications for all of our applications will be based on a machine capable of running Flash version 9.0, Adobe AIR version 3.5 (these should be recent updates to your systems; in most cases, you will have these already), and Java version 1.5. You should have at least 256MB of RAM and a 2GHz dual core processor. Additional requirements will
