I import the module with import tkinter as tk And everything is good, I can use tkinter and "print" it, but, if I want to use it to simulate something with the window, it doesn't work. Here a simplifie code example. Name of my project : simul Module name : simul.simul Let's try this: import tkinter as tk import sys class simulator(tk.Frame): def __init__(self, master): tk.Frame.__init__(self, master) self.button = tk.Button(self, text='press me', command=self.open) self.button.grid(row=0, column=0) self.open() self.grid() def open(self): print('I am open!') d0c515b9f4
