Existing question - better implementation? I am working on an iOS application. I am using the com.domain.app namespace. My isolated storage path is like this: My device : Problem: If the app is upgraded to a newer iOS version by using the update-configuration-xcf command, I have problems when updating the app. I have found a solution for this : `file:///var/mobile/Applications/{app_UID}/Documents/{app_UID}/isolatedStorage/appPath` But, this solution does not work in my
