An easy-to-use GUI tool for analyzing OpenCL, Brook+ and IL kernels for performance. When using AMD APP KernelAnalyzer as a GUI tool for interactive tuning of your kernels, it allows you to browse, debug and re-compile OpenCL, Brook+ and IL kernels live. When you are ready to view your performance tuning in a more detailed manner, AMD APP KernelAnalyzer allows you to use it in command line mode to generate detailed reports about your kernels. AMD APP KernelAnalyzer Features: Kernels Analyzer: - Multithreading mode for OpenCL - Support for visual debugging of OpenCL kernels - Support for debugging of Brook+ and IL kernels - Generates detailed and "difficult to read" report - Lists additional parameters which are available for OpenCL kernels, Brook+ and IL kernels (listed below) - Allows you to disable flushing of the executable memory - Assigns a unique handle to each kernel you analyze AMD APP KernelAnalyzer Command Line: - Command line mode to generate detailed reports about your kernels. - Generates ASCII (text), HTML and EXE format reports - Generates an ASCII report which has been stripped of debugging symbols - Prints assembly of the generated kernel if it is specified in the kernel file Microsoft Visual C++ Compiler for AMD APP: - A separate redistributable package containing only the Visual C++ compiler that produces AMD APP compatible OpenCL, Brook+ and IL kernels - AMD APP KernelAnalyzer can use this compiler to produce OpenCL compatible kernels. - AMD APP KernelAnalyzer does not install any VC++ compiler on your system - If you have an AMD APP compatible VC++ Redistributable installed on your system, AMD APP KernelAnalyzer will use it automatically. Otherwise, this redistributable package will install a VC++ Redistributable used by AMD APP KernelAnalyzer for kernel analysis.
